

ROOM DARKENING SIDE, CENTRE & BOTTOM CHANNELS

Side Channel

Centre Channel

Bottom Channel

DESCRIPTION

Room Darkening Side, Centre & Bottom Channels are installed on the window frame to cover the light gap between the frame and the shade fabric. Elite side channels include a double set of brushes within the channel to block light leakage and to prevent the aluminum components from rubbing while the shade is in motion. Side, Centre, & Bottom channels are a perfect solution for blocking light in boardroom rooms, media rooms, offices, or bedrooms.
